

DUCK

ROPE GRAB

888

NEW!

WORKS ON WEBBING TOO!

DUCK, the new emergency belay device. Conceived for single ropes with diameters from 5/6" to 1/2". The DUCK is the first and only belay device that also works on tubular webbing with widths from 3/8" to 9/16". Due to the DUCK's small dimensions, rope or webbing can easily be inserted with one hand. The large hole allows for rotation of sleeve connectors. The DUCK can be used as an emergency belay device during retrievals, self belay, progression maneuvers and for regulating daisy chains.
