

X-TRIM SPINAL BOARD and EVEREST RESCUE KIT

Kng-855-set.03 X-TRIM, EVEREST and TAYLAN immobilization binding

KONG, the world's leading company in the production of rescue items for hostile surroundings, presents a new foldable spinal board entirely made of carbon fiber. The board is exceptional in "roll on" maneuvers thanks to its low weight (less than 11 lbs.) and extremely low thickness.

Fully x-ray transparent, no metallic components, it can be inserted in T.A.C. Magnetic Resonance Imaging (MRI) and other diagnostic apparatus avoiding an additional transfer of the injured.

Designed for every type of rescue operation (ambulance, helicopter, etc.), it is suitable for hand use in wild environments and fits most heli-rescue bags. Ready to use in a matter of seconds.

The complete package weights only 22 lbs.
